

Environmental Policy Statement

Constant Cooling Ltd and Constant Cooling Services are committed to minimising the impact our business activities have on the environment. To attain this we shall:

- Seek to continually improve processes and procedures through regular monitoring and review.
- Monitor, review and comply with all relevant environmental legislation, regulations, standards and other relevant codes of practice.
- Seek to prevent pollution, and ensure staff understand the potential impact their work could have, on the environment through ongoing training.
- Support the phase out of all Ozone Depleting Substances and strictly adhere to the sale and use of these substances.
- Ensure customers make educated environmentally aware decisions, regarding existing and new equipment, through effective communication.
- Assist customers in complying with current and forthcoming legislation by written communication.
- Seek opportunities to reduce, reuse and recycle materials.
- Review and monitor suppliers to ensure effective environmental supply chain management.
- Communicate this policy to all staff and make available to customers and suppliers.

This policy has the full support of our management team.
